Subject: Convert all Websites to HTTPS

We need to become more security aware, since we are hosting confidential data that has legal and regulatory requirements to be protected. All of our websites are using HTTP and not HTTPS which could allow attacks. Please convert the ECOM website to an HTTPS service. You should redirect on the HTTP service to direct visitors over to the HTTPS service.

Provide screenshots of the web server configuration and screenshots of the http and https versions of the websites.

Thank you.
