Subject: Inventory

The previous IT team did a poor job keeping the management informed on what they were doing. As a result, we have no clear idea of what resources are currently available. Please inventory every system, the accounts they possess, and the services provided. Create a summary report of all that you find. The report should list:

- System Name
- Platform (Windows, Linux, Solaris etc..)
- Account list
- Service list
- Updates
- (optional) Passwords for each account

Please keep the report updated to reflect changes to our network. If any of these changes, then submit an updated report.

Thank you.
