Subject: Deploy Wordpress

Our users are complaining about our new services and features. I have heard wikis are a great feature to quickly publish instructions and would allow our users to make contributions as well.

I've heard that Wordpress is a great content management system that allows users to publish instructions and make other contributions. Please put up a Wordpress site and HQ will review it.

I am really excited about this Wordpress site. It'll be a great way to get more involvement and feedback from our users.

Please have this done in an hour.

Submit a screenshot and show that it can be edited like a wiki.

Thank you.
