2014 MINNESOTA COLLEGIATE CYBER DEFENSE COMPETITION

WELCOME! This competition allows institutions of higher education to assess their students' depth of understanding and operational competency in managing the challenges inherent in protecting business IT networks. We have seven teams competing in this contest.

Advance IT Minnesota is happy to bring these teams together this year with assistance from the Center for Systems Security and Information Assurance (CSSIA) and hosting support of Alexandria Technical and Community College and Minneapolis Community and Technical College.

The top two teams from this Minnesota competition will be invited to participate in the 2014 Midwest Regional Collegiate Cyber Defense Competition, hosted by Moraine Valley Community College, Palos Hills, Illinois, on March 28-29, 2014. The winner of that contest will compete in the 2014 National CCDC, in San Antonio, Texas, from April 25-27.

This program provides an anticipated schedule of activities and a listing of participants in various roles. The State Director of Minnesota and the Chief Judge reserve the right to change the schedule as necessary.

Many thanks to staff & volunteers in the Black and Gold Teams for facilitating this event and supporting our students, to the Red Team volunteers, to our hard working White Team judges and our generous sponsors!
