Subject: Install Exchange

Great news! Fusion Systems have also decided to use us for the email needs since their current email system is on its last legs and cannot be accessed externally. They have requested that we install Exchange 2007 on a new server so that they can access it from anywhere. This will also help facilitate their future growing needs. They said to make sure Active Directory is configured properly with Exchange. In addition, the CEO of their company uses a Mac, so make sure all configurations will be in place to allow him to connect. Please give detailed instructions on how to log into the system.

Please also create the following accounts:

User Name - Name - Password

JStafford - John Stafford - jman

JStack - Jeff Stack - bluebird

JCarey - Jane Carey - notjim

CMurano -- Carla Murano - betafish

They&amp;amp;amp;amp;amp;amp;amp;#039;re loosing precious sales and would like this done in 3 hours.

Thank you.
